

Noble® DNC Manager

Real-time Do Not Call List Management

The Noble® DNC Manager is a state-of-the-art system that helps you stay in compliance with Do Not Call regulations by administering your DNC lists. The system screens calls in real-time, as they are dialed, so you can be sure that only the right parties are being called.

With DNC Manager, you eliminate the extra step of scrubbing your lists before you begin dialing. The system does the scrubbing for you while the campaign is in production! Integration with your internal files means that your call results enter the system in real-time, so you can be sure that any newly-coded DNC records are screened out automatically. Noble's exclusive real-time call list screening is a huge advantage to centers trying to remain in compliance with DNC regulations.

- Real-time number screening against DNC lists while a campaign is in production (pre-production screening is also available)
- Full DNC Manager server integration with the Noble application host
- Customization Tools allow you to add your own internal DNC lists to the master file
- Newly-coded DNC records are automatically added to the screening process
- Preference settings turn the DNC Manager 'On' and 'Off' on a campaign-by-campaign basis
- DNC Manager Reporting & Management tools included to monitor DNC activity
- Quarterly List Updates available from Noble Partners, or choose your own preferred provider

“ With Do Not Call Lists, we were faced with the challenge of how to comply with the legislation. Noble gives us the ability to screen our calling lists against DNC lists, and to remove those numbers. We have confidence that the Noble technology helps to protect us. ”
